

The only non-prescription option specifically indicated for the symptomatic relief of the burning pain and stinging of cystitis in adult women.

Symptom checklist

If you experience cystitis symptoms, complete this checklist. Be sure to bring it with you when seeing a healthcare professional. It could be handy when discussing your condition with your pharmacist or your doctor.

- a stinging or burning sensation when you pass urine (dysuria)
- the need to pass urine more often (frequency)
- feeling you want to urinate urgently, even if you pass very little or no urine (urgency)
- cloudy, dark colored or strong smelling urine
- blood in your urine
- pain in your lower back, side or abdomen, or directly above the pubic bone
- feeling generally unwell
- fever and chills
- nausea and vomiting
